Assisted Install Package

We Install — You Dig

How It Works

In an assisted install, you handle excavation and backfilling — we handle everything else related to the pool itself. This is ideal for homeowners who have access to excavation equipment or are working with a contractor.

What's Included (Okeanos)

Item	Details
Pool Shell	Fiberglass pool — your selected model, white gelcoat
Freight	53' flatbed delivery to your property
Crane	45-ton crane + lifting straps
Foundation	Geotextile fabric + clear stone base preparation
Installation	Pool setting, shimming, and levelling
Plumbing	Full plumbing from pool to equipment pad area
Equipment	Hayward package: pump, filter, salt system, heater, light
Drainage Well	Dewatering well installed beside skimmer
Work Site Manager	Okeanos manager + installer for filtration on-site
Gravel	½" clear stone for backfill (tonnage based on model)
Pool School	Hands-on training on operation and maintenance

Roles — Your Responsibility vs Ours

Your Role	Our Role
Excavation to exact pool dimensions + evacuation of earth BEFORE installation day	Verification of dimensions and heights excavated
Minimum 3 people on site on installation day	Work site manager + installer for filtration
Clear access for crane and delivery truck	45-ton crane + lifting straps (90T available if needed)
Equipment to backfill: mechanical shovel, loader, wheelbarrow, shovels	Geotextile, dewatering well, clear stone supply
Backfill the pool with stone as directed — step by step until pool edge	Foundation, installation, shimming, levelling of pool
Dig trench from pool to equipment area (per pre-install guide)	Full plumbing and equipment installation
Fill pool with garden hoses or water truck by end of work day	The 2x4 braces needed to support the pool during landscaping
